

P Series - Table Top-Type Impulse Poly Sealers

Applications and Features: Tabletop, hand-operated

Also called: Poly sealer®

Operating method: Hand-operated

Packaging type: Seal only

Daily use frequency as model selection guideline: Up to 1,000 bags, hand-operated

Bag size (max): Up to 20/ 30cm

Compatible packaging materials (total thickness of two or more sheets):

PE>0.2mm, PP>0.2mm, NY>0.1mm, PVA>0.1mm, other laminated materials>0.1mm

- The four types of sealers beep when finishing sealing.
- The Model P-200 and P-300 are easy-to-use, table-top type impulse sealer suitable for short-run packaging, and used even at shop front since it does not occupy much space. And it is the best for packaging parts etc., small quantity, even at packaging of sweets in a shop front, or a factory.
- Only depressing lever lightly is needed for strong sealing.
- The PC-200 and PC-300's cutter can trim the pouch above the seal to produce a neat clean package; it also allows you to make bags from roll polyethylene tubing.
